Title:	Is there a link between pension-fund assets and economic growth? - A cross-country study
Authors:	Davis, EP (/browse?type=author&value=Davis%2C+EP) Hu, YW (/browse?type=author&value=Hu%2C+YW)
Keywords:	Pension funds, economic growth, production function, panel estimation
Issue Date:	2004
Publisher:	Brunel University
Citation:	Economics and Finance Working papers, Brunel University, 04-23
Abstract:	Debate over superiority of pension funding over pay-as-you-go links notably to the question whether funding improves economic performance sufficiently to generate additional resources to meet the needs of an ageing population. To address this issue, we design a modified Cobb-Douglas production function with pension assets as a shift factor, and investigate the direct link between pension assets and economic growth employing a dataset covering up to 38 countries, using a variety of appropriate econometric methods. We find positive results for both OECD countries and Emerging Market Economies (EMEs), with consistent evidence for a larger effect for EMEs than OECD countries.
