## Measuring and explaining competition in the financial sector

Bikker, J.A.; Spierdijk, L.  
(2009) Discussion Paper Series / Tjalling C. Koopmans Research Institute, volume 09, issue 01  
(Working paper)

### Abstract

The first part of this paper provides a systematic discussion of the structural problems of competition on financial markets as observed from the demand and from the supply side, using a diagnostic framework. Potential impediments to competition are concentration, entry barriers, lack of transparency, product complexity, switching and search costs, ... [read more](#) (.).
