

Research on the Feasibility of Rural Land Trust Circulation

YUE Yi-ding, WANG Qiong (School of Business, Central South University, Changsha 410083, China)

Based on the analysis of the comparative advantage of rural land trust circulation, this article analyzes the feasibility of the establishment of it in the country from the aspects as the current policy and legal basis, the practical foundation and conditions and the foreign experience and reference. In order to construct a normative marketized operation model of rural land circulation, this article puts forward some policy suggestions from such aspects as specifying the right and the duty of the party concerned in the land trust transference, designing reasonable land trust income distribution and risks sharing mechanism, constructing multi-functional land trust intermediary service organizations, cultivating and supporting rural land trust transference operators and establishing the corresponding matching policy and measures as well.
