**Abstract:**  
Enterprises are facing difficult problems such as overstock, funds shortage and so on under a grim economic recession caused by global financial crisis. Warehouse financing of ports-hinterland supply chain system could liquidize cash occupied by a large backlog of inventory, effectively alleviate the financial situation of enterprises. From the perspective of game theory, this paper explores the theoretical basis of ports-hinterland supply chain system warehousing financing, building general economic model to improve benefit of warehousing financing.
