We value your privacy

We and our partners store and/or access information on a device, such as cookies and process personal data, such as unique identifiers and standard information sent by a device for personalised ads and content, ad and content measurement, and audience insights, as well as to develop and improve products. With your permission we and our partners may use precise geolocation data and identification through device scanning. You may click to consent to our and our 845 partners' processing as described above. Alternatively you may click to refuse to consent or access more detailed information and change your preferences before consenting. Please note that some processing of your personal data may not require your consent, but you have a right to object to such processing. Your preferences will apply to this website only. You can change your preferences at any time by returning to this site or visit our privacy policy.

Biographies

Paul Madden is currently Professor of Economic Theory in the University of Manchester. He has researched a number of different areas of macroeconomic theory (disequilibrium macroeconomics, imperfect competition and business cycles) and microeconomic theory (the economics of crime, imperfectly competitive labour markets, industrial organisation, welfare economics). During the last 3 years the economics of professional sports leagues has become his major research interest.
