a pernicious effect on the working of public and private administrations: all too often they are the slippery slope to more serious forms of corruption; they impose additional costs on companies and citizens; and in the long run they sap the ethical foundations of organisations. Although many articles on corruption mention facilitating payments, there have been no systematic studies from a company's point of view. This article thus focuses on facilitating payments from the point of view of the company that makes the payment, either as the active partner (when it is the company that takes the initiative) or as the passive partner (when the official or employee is the instigator).
