### Your privacy, your choice

We use essential cookies to make sure the site can function. We, and our 96 **partners**, also use optional cookies and similar technologies for advertising, personalisation of content, usage analysis, and social media.

By accepting optional cookies, you consent to allowing us and our partners to store and access personal data on your device, such as browsing behaviour and unique identifiers. Some third parties are outside of the European Economic Area, with varying standards of data protection. See our **privacy policy** for more information on the use of your personal data. Your consent choices apply to springer.com and applicable subdomains.

You can find further information, and change your preferences via 'Manage preferences'. You can also change your preferences or withdraw consent at any time via 'Your privacy choices', found in the footer of every page.

We use cookies and similar technologies for the following purposes:

- > Store and/or access information on a device
- Personalised advertising and content, advertising and content measurement, audience research and services development

### **Notes**

- 1. In 1999 the proportion of PE-financed LBOs was 57%. Later, in the second wave, however, PE firms focussed on larger deals. Nevertheless, the proportion of PE-financed LBOs in 2004 was 38% (CMBOR 2006).
- 2. This arises as financiers are able to negotiate contractual conditions in the shareholders' agreement providing for such disclosure.
- 3. Note, if unobserved differences between buyouts and non-buyout firms are constant over time, they will be captured by the firm-specific fixed effects. We also adopt a more rigorous approach to differences between LBOs and non-LBOs by employing a generalised instrumental variable estimator.

### Your privacy, your choice

We use essential cookies to make sure the site can function. We, and our 96 **partners**, also use optional cookies and similar technologies for advertising, personalisation of content, usage analysis, and social media.

By accepting optional cookies, you consent to allowing us and our partners to store and access personal data on your device, such as browsing behaviour and unique identifiers. 8. The instruments used in each equation are  $n_{it}$ ,  $w_{it}$ ,  $y_{it}$  lagged t-3 to t-5.

Appropriate instrument sets were selected using Hansen and serial correlation tests.
