- 3. We should highlight that forecasts for many explanatory variables are not necessary because these explanatory variables represent initial conditions that lag some years compared to growth, though there are some contemporaneous correlates as well. When it is only the regressand, the growth rate of GDP, which contains a measurement error due to the adoption of forecasts, it boosts the standard error of the estimate but does not distort the unbiasedness of the regression.
- 4. It was widely expected that countries undergoing transition would experience an initial decline in output and employment, but the depth and the length of the post-communist recession were unexpected (Fischer, 2002; Svejnar 2006). The literature has proposed various explanations for this phenomenon. Svejnar (2006) categorises them into six main themes. First, a disorganisation among suppliers, producers and consumers associated with the central planning;

capita income, as well as Mongolia, in order to be able to analyse all CEECCA countries using the same model.

- 7. Multicollinearity among some variables may also explain the difficulties in finding a single best model. Note that multicollinearity affects the parameter estimates and their standard errors, but it does not reduce the predictive power or reliability of the model as a whole.
- 8. There are clear differences within the CEECCA region, however. The CEE10 have reached the highest level of integration, followed by the countries of the western Balkans that have either EU 'candidate' or 'potential candidate' status. The six 'Eastern Partnership' countries, which were part of the Soviet Union, have reached a varying degree of integration with the EU15, while

- 13. The sample period of <u>Böwer and Turrini (2010)</u> covers actual data till 2007 and the spring 2008 forecast of the European Commission for 2008.
- 14. The income thresholds we applied were defined in the section 'Methodology and model selection issues'. We did not include the four EU15 countries falling within the thresholds (Greece, Italy, Portugal and Spain). The 44 countries are: Albania, Algeria, Argentina, Azerbaijan, Belarus, Bosnia/Herzegovina, Botswana, Brazil, Chile, Colombia, Costa Rica, Croatia, Dominican Republic, Ecuador, El Salvador, Gabon, Iran, Israel, Jamaica, Kazakhstan, South Korea, Lebanon, Libya, Macedonia, Malaysia, Mauritius, Mexico, Namibia, New Zealand, Oman, Panama, Peru, Russia, Saudi Arabia, Serbia, South Africa, Taiwan, Thailand, Trinidad and Tobago, Tunisia, Turkey, Ukraine, Uruguay, and Venezuela.
