Flood Risk Assessment and Vulnerability Management Strategies

Author information

Authors and Affiliations

Chair of Department of Operations and Information Management, Cecilia Yen Koo Professor of Decision Sciences and Public Policy, The Wharton School, University of Pennsylvania and co-Director of Wharton Risk Management and Decision Processes Center.,

Howard Kunreuther

Additional information

This is a revised version of a paper presented at the Geneva Association's Conference on Strategic Issues in Insurance held in London, England (24–27 October 2000). Support from NSF GrantCMS97-14401 to the University of Pennsylvania and from the Wharton Risk Management and Decision Processes Center Managing Catastrophic Risk project is gratefully acknowledged. Helpful comments were received from Paul Kleindorfer and participants at the Wharton Managing Catastrophic Risk Sponsors Meeting in Bermuda on 15–16 May 2000. Special thanks to Applied Insurance Research, EQE and Risk Management Solutions for constructing exceedance probability curves for the model cities and for their help in analysing the impact of parameterized indexed cat bonds on the losses to insurers. Jaideep Hebbar, with the assistance of Pooja Goyal, Patricia Grossi and Vikram Prasad, spent many hours analysing the data from Oakland and helped construct the relevant tables and figures in the paper.
