## The Japan Municipal Bond Yield Curve: 2002 to the Present

Hattori, Takahiro and Miyake, Hiroki (2016): The Japan Municipal Bond Yield Curve: 2002 to the Present.

## Abstract

The aim of this paper is to present the par yield curve for Japan's Municipal Bonds, by examining daily data from 2002 to the present. Moreover, this paper contributes to current literature by making available for the first time additional long-run market data on Japan's Municipal Bonds, and thereby enabling economists and practitioners to analyze the large municipal bond market of Japan in detail. We also investigate the fit of the well-known parametric and spline methods and are able to show that the spline method does, in fact, fit well as in previous studies. In keeping with our aim to make these data more widely available, we posted the data on the following website and expect to update this regularly: http://www.mcnnns77.net.

Item Type: MPRA Paper
    Original The Japan Municipal Bond Yield Curve: 2002 to the Present
       Title:
 Language: English
 Keywords: Term structure of interest rates; Par yield curve; Municipal bond market; Japan
             E - Macroeconomics and Monetary Economics > E4 - Money and Interest Rates > E43 - Interest Rates: Determination, Term Structure, and Effects
  Subjects: G - Financial Economics > G1 - General Financial Markets > G12 - Asset Pricing ; Trading Volume ; Bond Interest Rates
             H - Public Economics > H7 - State and Local Government ; Intergovernmental Relations > H74 - State and Local Borrowing
   Item ID: 69725
 Depositing Mr. Hiroki Miyake
