AN EMPIRICAL ANALYSIS OF WARRANT PRICES VERSUS LONG-TERM CALL OPTION PRICES

CHRIS VELD AND ADRI VERBOVEN*

INTRODUCTION

In their well-known warrant pricing paper Galai and Schneller (1978) demonstrated that otherwise identical warrants and call options, should have the same price. No empirical research that confronts this result with actual data appears to be available, which is probably caused by the fact that warrants usually have a much longer time to maturity than call options. However, this is not the case for the Dutch capital market. Since 1986, the European Options Exchange (EOE) in Amsterdam provides for trading in call and put options on individual stocks with maturities up to a maximum of five years. In the last few years, these long term option contracts have become increasingly popular among investors in the Netherlands, resulting in steady growing trading volumes and considerable open interest positions.^{1,2} Moreover, at the

This test reveals that warrants appear to have substantial higher market prices than the concomitant long term call option contracts. This result turns out to be robust to the choice of either the Binomial model, the Merton model or the Square Root CEV model to compute the implied standard deviation.

* The authors are both from the Department of Business Administration at Tilburg University, The Netherlands. They are much indebted to Uri Ben-Zion, Sudipto Bhattacharya, Michel Crouhy, Pieter Duffhues, Dan Galai, Angeliem Kemna, Pieter Moerland, Siegfried Trautmann, Ton Vorst and the participants at the AFFI-Conference, 1991, in Louvain-la-Neuve, Belgium; the 'Workshop on Share and Bond Derivative Contracts', 1992, in Tilburg; The European Finance Association, 1992, in Lisbon; and The Northern Finance Association, 1992, in Toronto, for helpful comments and suggestions. Special thanks go to Theo Nijman for his detailed comments. Finally they thank Jos Lemmens, Michel van Bremen and Lysanne van der Made for their computational and research assistance. The authors are solely responsible for any remaining errors. (Paper received March 1993, revised and accepted June 1994)
