The authors wish to express appreciation to Jerry Stevens, James Wansley, and two anonymous referees for helpful comments. Remaining shortcomings are the responsibility of the authors.

## Abstract

The common stock price response to the announcement by Standard and Poor of CreditWatch placement and commercial paper reratings is examined. Results indicate a negative stock price response to negative placements on the CreditWatch list and to commercial paper rating reductions. A cross-sectional model is estimated to identify firm characteristics associated with the stock market response.
