An earlier version of the paper was presented at the Academy of Financial Services and Chinese Management Educators Association meetings. Helpful comments from Tony Cherin and two anonymous referees are gratefully acknowledged. We are responsible for the remaining errors. We appreciate Morningstar Inc. for providing the data. Kao's participation was partially funded by a Summer research grant at DePaul University. Chan acknowledged the financial support from a faculty Summer research grant at the University of Wisconsin-Parkside.

Abstract

This study examines the selectivity and market-timing ability of international mutual fund managers. Ninety-seven international mutual funds with a minimum of five-year return history selected from the *Morningstar OnDisc* database are analyzed. Our findings suggest that managers of international mutual funds possess good selectivity and overall performance. We also find weak evidence of poor market-timing ability. Consistent with prior findings from domestic mutual funds, there is a negative correlation between the international fund managers' selection ability and market-timing ability. Finally, managers for Europea funds show poorer performance than those managing the other three international fund groups.
