I thank Sanjiv Das, Terry Odean, John Payne, and Meir Statman for their comments on a previous version, Judy Bruner and Chris Paisley for key insights, and especially Don Chew for his help in shaping the paper. Financial support from the Leavey School of Business and Dean Witter Foundation is gratefully acknowledged. This paper draws on material from my book, *“Beyond Greed and Fear: Understanding Behavioral Finance and the Psychology of Investing”* (Boston: Harvard Business School Press, 1999).
