Title:	The Impact of Backwardation on Hedgers' Demand for Currency Futures Contracts: Theory versus Empirical Evidence
Language:	English
Date:	1 February 2008
Place of Publication:	Darmstadt
Series:	Darmstadt Discussion Papers in Economics
Series Volume:	190
Abstract:	This study compares the relation between backwardation and optimal hedging demand as suggested by economic theory to empirical findings concerning the impact of weak and strong backwardation on hedgers' trading volume in six long and short currency futures contracts. First, the optimal hedging demand of a representative importer, with and without hedging costs, is derived. Then hedgers' position data from the Commitments of Traders (COT) report are regressed on weak and strong backwardation. The results offer little support for the hypotheses sug
