Under the traditional “competition–fragility” view, more bank competition erodes market power, decreases profit margins, and results in reduced franchise value that encourages bank risk taking. Under the alternative “competition–stability” view, more market power in the loan market may result in higher bank risk, as the higher interest rates charged to loan customers make it harder to repay loans, and exacerbate moral hazard and adverse selection problems. The two strands of the literature need not necessarily yield opposing predictions regarding the effects of competition and market power on stability in banking. Even if market power in the loan market results in riskier loan portfolios, the overall risks of banks need not increase if banks protect their franchise values by increasing their equity capital or engaging in other risk-mitigating techniques. The authors test these theories by regressing measures of loan risk, bank risk, and bank equity capital on several measures of market power, as well as indicators of the business environment, using data for 8235 banks in 23 developed nations. The results suggest that – consistent with the traditional “competition–fragility” view – banks with a higher degree of market power also have less overall risk exposure. The data also provide some support for one element of the “competition–stability” view – that market power increases loan portfolio risk. The authors show that this risk may be offset in part by higher equity capital ratios.

Introduction

∨ PART I: MEASUREMENT OF  
FINANCIAL-SECTOR  
COMPETITION

Chapter 1: Market power:  
competition among measures

Chapter 2: The Panzar–Rosse  
revenue test and market  
power in banking: an  
empirical illustration

Chapter 3: Adapting  
conjectural variations  
methods to banking  
competition

Chapter 4: Bank risk and  
competition: the other side of  
the story

Chapter 5: Competition,  
concentration and critical  
mass: why the Herfindahl–  
Hirschman Index is a biased  
competition measure

∨ PART II: EMPIRICAL RESULTS ON  
COMPETITION IN BANKING AND  
INSURANCE

Chapter 6: Global  
developments in banking  
competition

Chapter 7: Competition in the  
European banking markets in  
the aftermath of the financial  
crisis

Chapter 8: Bank competition  
in China

Chapter 9: Performance of the  
life insurance industry under  
pressure: efficiency,  
competition and  
consolidation

∨ PART III: SPILL-OVERS OF  
FINANCIAL-SECTOR  
COMPETITION

**Chapter 10: Bank competition**

Chapter 11: Measuring agency costs and the value of investment opportunities of US bank holding companies with stochastic frontier estimation

Chapter 12: Banking competition and economic growth

Chapter 13: Shadow banking and competition: decomposing market power by activity.

Chapter 14: Banking competition and interest rate pass-through

∨ PART IV: COMPETITION IN BANKING SUBMARKETS AND SUBSECTORS

Chapter 15: SME business loans

Chapter 16: Competition and price conduct by bank service line

Chapter 17: Competition and contestability in bank retail markets

Chapter 18: Bank market power and loan growth
