This chapter provides a data-driven overview of the different online platforms that consumers use to search for books and for booksellers, and documents how the use of these platforms is shifting over time. Our data suggest that, as a result of digitization, consumers are increasingly conducting searches for books at retailer sites and using closed systems (e.g., the Kindle and Nook) rather than at general search engines (e.g., Google or Bing). We also highlight a number of challenges that will make it difficult for

researchers to accurately measure internet-based search behavior in the years to come. Finally, we highlight a number of open agenda items related

highlight a number of open agenda items related to the pricing of books and other digital media, as well as consumer search behavior.
