ISSUE DATE August 2010

In models with complete markets, targeting core inflation enables monetary policy to maximize welfare by replicating the flexible price equilibrium. In this paper, we develop a two-sector two-good closed economy new Keynesian model to study the optimal choice of price index in markets with financial frictions. Financial frictions that limit credit-constrained consumers' access to financial markets make demand insensitive to interest rate fluctuations. The demand of credit-constrained consumers is determined by their real wage, which depends on prices in the flexible price sector. Thus, prices in the flexible price sector influence aggregate demand and, for monetary policy to have its desired effect, the central bank has to stabilize price movements in the flexible price sector. Also, in the presence of financial frictions, stabilizing core inflation is no longer equivalent to stabilizing output fluctuations. Our analysis suggests that in the presence of financial frictions a welfare-maximizing central bank should adopt flexible headline inflation targeting--a target based on headline rather than core inflation, and with some weight on

the output gap. We discuss why these results are particularly relevant for emerging markets, where the share of food expenditures in total consumption expenditures is high and a large proportion of consumers are credit-constrained.

More from NBER

In addition to [working papers](#), the NBER disseminates affiliates' latest findings through a range of free periodicals — the [NBER Reporter](#), the [NBER Digest](#), the [Bulletin on Retirement and Disability](#), the [Bulletin on Health](#), and the [Bulletin on Entrepreneurship](#) — as well as online conference reports, video lectures, and interviews.

The image shows a YouTube video player interface. At the top, the title is "14th Annual Feldstein Lecture - Summer Institute 2022 Fi...". The NBER logo is on the left, and "Watch later" and "Share" buttons are on the right. The video content is split into two parts: a video of Gita Gopinath speaking on the left, and a slide on the right. The slide is titled "Need an 'Integrated Policy Framework'" and contains the following text:

- Practice: Countries use a combination of multiple instruments
 - policy rate, FX intervention, capital controls, domestic macroprudential policies
- But there is no welfare-maximizing framework which integrates these multiple tools and multiple frictions
- Papers
 - Optimal Monetary and Financial Policies in a Small Open Economy (Basu, Boz, Gopinath, Roch, Unsal, 2021)
 - A Conceptual Model for the Integrated Policy Framework (Basu, Boz, Gopinath, Roch, Unsal, IMF WP 2020)

At the bottom of the video player, there is a "Watch on YouTube" button and the following text: "Managing a Turn in the Global Financial Cycle", "Gita Gopinath, International Monetary Fund", and "Martin Feldstein Lecture, Summer Institute 2022".
