WORKING PAPER 20230

DOI 10.3386/w20230

ISSUE DATE June 2014

Monetary policy affects the real economy in part through its effects on financial institutions. High frequency event studies show the introduction of unconventional monetary policy in the winter of 2008-09 had a strong, beneficial impact on banks and especially on life insurance companies. I interpret the positive effects on life insurers as expansionary policy recapitalizing the sector by raising the value of legacy assets. Expansionary policy had small positive or neutral effects on banks and life insurers through 2013. The interaction of low nominal interest rates and administrative costs forced money market funds to waive fees, producing a possible incentive to reach for yield to reduce waivers. I show money market funds with higher costs reached for higher returns in 2009-11, but not thereafter. Some private defined benefit pension funds increased their risk taking beginning in 2009, but again such behavior largely dissipated by 2012. In sum, unconventional monetary policy helped to stabilize some sectors and provoked modest additional risk taking in others. I do not find evidence that the financial institutions studied formented a tradeoff between expansionary policy and financial stability at the end of 2013.

More from NBER

In addition to [working papers](#), the NBER disseminates affiliates' latest findings through a range of free periodicals — the [NBER Reporter](#), the [NBER Digest](#), the [Bulletin on Retirement and Disability](#), the [Bulletin on Health](#), and the [Bulletin on Entrepreneurship](#) — as well as online conference reports, [video lectures](#), and [interviews](#).

The image shows a YouTube video player interface. At the top, the video title is "14th Annual Feldstein Lecture - Summer Institute 2022 Fi...". The NBER logo (National Bureau of Economic Research) is visible. There are icons for "Watch later" and "Share". The video content shows Gita Gopinath speaking at a podium. A play button is overlaid on the video. To the right of the video, there is a slide titled "Need an 'Integrated Policy Framework'". The slide contains the following text:

- Practice: Countries use a combination of multiple instruments
 - policy rate, FX intervention, capital controls, domestic macroprudential policies
- But there is no welfare-maximizing framework which integrates these multiple tools and multiple frictions
- Papers
 - Optimal Monetary and Financial Policies in a Small Open Economy (Basu, Boz, Gopinath, Roch, Unsal, 2021)
 - A Conceptual Model for the Integrated Policy Framework (Basu, Boz, Gopinath, Roch, Unsal, IMF WP 2020)

At the bottom of the video player, there is a "Watch on YouTube" button and the text: "Managing a Turn in the Global Financial Cycle", "Gita Gopinath, International Monetary Fund", and "Martin Feldstein Lecture, Summer Institute 2022".
