Recent Evidence on Budget Deficits and National Savings

James M. Poterba & Lawrence H. Summers

WORKING PAPER 2144

DOI 10.3386/w2144

ISSUE DATE February 1987

This paper examines the recent United States experience with sustained budget deficits and concludes that the events of the last five years cast significant doubt on the proposition that the timing of taxes does not affect national savings. Rather than raising private saving, the recent deficits have if anything coincided with reduced saving and increased consumption. These findings suggest that realistic analysis of fiscal policies must recognize that consumers are liquidity constrained and/or myopic.
