Financing Entrepreneurship through the Tax Code: Angel Investor Tax Credits

WORKING PAPER 26486

DOI 10.3386/w26486

ISSUE DATE November 2019

A central issue in public finance is the tradeoff between maintaining tax revenues and using the tax code to incentivize particular economic activities. One important dimension of this tradeoff is whether incentive policies are used in practice as policymakers intend. This paper examines one particular tax program that many U.S. states use to stimulate entrepreneurship. Specifically, angel tax credits subsidize wealthy individuals' investments in startups. This paper finds that these programs have no measurable effect on local entrepreneurial activity or beneficiary company outcomes, despite increasing some measures of angel activity. This appears to reflect the programs failing to screen out financially unconstrained firms and often being used for tax arbitrage. Over 90 percent of beneficiary companies fall into at least one of three categories: a corporate insider received a tax credit; the company previously raised external equity; or the company is not in a high-growth sector. Notably, at least 33 percent of beneficiary companies include an investor receiving a tax credit who is an executive at the company.

This working paper has been superseded by the authors' later work "Investor Tax Credits and Entrepreneurship: Evidence from U.S. States," [NBER working paper, no. 27751](#). Please use that working paper for citation.

Need an "Integrated Policy Framework"

- Practice: Countries use a combination of multiple instruments
 - policy rate, FX intervention, capital controls, domestic macroprudential policies
- But there is no welfare-maximizing framework which integrates these multiple tools and multiple frictions
- Papers
 - Optimal Monetary and Financial Policies in a Small Open Economy (Basu, Boz, Gopinath, Roch, Unsal, 2021)
 - A Conceptual Model for the Integrated Policy Framework (Basu, Boz, Gopinath, Roch, Unsal, IMF WP 2020)
