WORKING PAPER 2926

DOI 10.3386/w2926

ISSUE DATE April 1989

Under free capital mobility, confidence crises can result in devaluations even when fixed exchange rates are viable, if fiscal authorities can obtain temporary money financing. During a crisis, domestic interest rates increase reflecting the expected devaluation. Rather than selling debt at punitive rates, fiscal authorities will turn to temporary money financing, leading to equilibria with positive probability of devaluation. These equilibria can be ruled out if the amount of debt maturing during the crisis is sufficiently small- a condition that can be met by reducing the stock of public debt, lengthening its average maturity and/or smoothing the time distribution of maturing issues.

### Need an "Integrated Policy Framework"

- Practice: Countries use a combination of multiple instruments
  - policy rate, FX intervention, capital controls, domestic macroprudential policies
- But there is no welfare-maximizing framework which integrates these multiple tools and multiple frictions
- Papers
  - Optimal Monetary and Financial Policies in a Small Open Economy (Basu, Boz, Gopinath, Roch, Unsal, 2021)
  - A Conceptual Model for the Integrated Policy Framework (Basu, Boz, Gopinath, Roch, Unsal, IMF WP 2020)
