incorporation of societal costs into science-based and proactive decisions regarding

unconventional oil and gas exploration and production in the United States more difficult and recommends some general steps for getting past those barriers.

Acknowledgments

I thank several anonymous contributors from federal agencies who provided insight and thoughtful correspondence on the framework proposed and overall direction of this article. All analysis and critique of current risk assessments being planned or carried out by federal agencies are mine alone. Many thanks also to the three anonymous peer reviewers whose thoughtful, detailed comments greatly improved the original draft.
