Abstract

This case study evaluates the financial features of Greek firms that were taken over during the period 1983-1990. A sample of acquired firms and a sample of equivalent non-acquired firms are considered with the objective of distinguishing between them, based upon their differences in sixteen financial characteristics 1-3 years prior to each takeover. Linear and quadratic discriminant analysis and logit models are developed with factor analysis input. Prediction results are mixed, mainly due to the similar financial ratio profiles between acquired and non-acquired firms. Most models classify
