Abstract

This paper examines sell-side analysts' perceptions of 'earnings quality'. Prior research suggests that analysts' stock recommendations, price targets, earnings forecasts and written reports are relevant to share price formation. One of the main inputs in analysts' forecasting and valuation models is earnings, and analysts' perceptions of earnings

express positive or negative opinions about earnings quality. It is relatively unusual for an analyst's opinion to be both negative and accounting-based. If, however, an analyst does express negative, accounting-based views on earnings quality, then he or she is highly unlikely to be positive in other respects. We interpret this evidence to be consistent with analysts' economic incentives to generate trading volume yet to be favourably biased towards companies, while seeking to use value-relevant information relating to earnings. We also conclude that the importance of accounting-based information relating to earnings quality is more important than it might seem, and that it exerts a significant influence on the analysis and recommendations in analysts' reports.

Keywords: earnings quality analysts' reports analysts' opinions

Notes

Richard Barker is Senior Lecturer at Judge Business School, University of Cambridge and Shahed Imam is Assistant Professor at Warwick Business School, University of Warwick.

The authors are grateful for helpful input from the Editor and the anonymous reviewers; also Rhoda Brown, Colin Clubb, John Holland, Geoff Meeks, Geoff Whittington and Wenjuan Zhang; seminar participants at Cambridge, Cardiff, and Warwick; and conference participants at the BAA.
