rigorous techniques, tend to suggest that the direction of causation between financial development and economic growth is supply-leading (rather than demand-following), as expected at the early stage of development. These findings have clear policy implications in that a pro-active policy of growth and reform of the financial sector will help enhance economic growth in an open developing economy like Saudi Arabia.

## Acknowledgements

The authors are thankful to King Fahd University of Petroleum & Minerals for their generous support. The corresponding author is also grateful to Saudi Aramco for sponsoring the Chair in Energy Economics. We are also grateful to Mr Lurion De Mello for his excellent research assistance.
