We Care About Your Privacy

We and our 855 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting "I Accept" enables tracking technologies to support the purposes shown under "we and our partners process data to provide," whereas selecting "Reject All" or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the ["privacy preferences"] link on the bottom of the webpage [or the floating icon on the bottom-left of the webpage, if applicable]. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

ACKNOWLEDGMENTS

The authors thank the University of Pittsburgh's Mascaro Sustainability Initiative (MSI) for their support of this project. MSI is aimed at initiating and nurturing research and education in the research thrust areas of green construction and sustainable water use. We appreciate the support and help of Castcon Stone Inc. as our case study. Castcon is one of the leading pre-cast concrete manufacturers in the United States. We also thank Pittsburgh's Green Building Alliance and the architectural firm Perkins Eastman.

Notes

¹New and old facility based on square foot comparison. There is one utility meter for both office and plant.

¹Total absences do not include excused with doctor's excuse or workers' compensation.

¹The ratio used to extrapolate data was changed to 25% building related and 75% production related.

²The ratio used to extrapolate data was changed to 25% building related and 75% production related.

³The production rate was changed from 180 pounds/foot to 180 pounds/foot.

⁴The production rate was changed from 180 pounds/foot to 180 pounds/foot.
