Acknowledgements

The first author wishes to thank the in-kind support provided to him, as a visiting researcher, by Ryerson University, Toronto, Canada, and the Natural Science and Engineering Research Council (NSERC) of Canada for their partial financial support. This work was further supported by a fellowship within the Postdoc-Programme of the German Academic Exchange Service (DAAD). The second and third authors thank NSERC for their financial support.

Finally, the authors thank the anonymous reviewers for their positive and constructive reviews.
