## Acknowledgements

The authors are grateful to the editor (Peter Fleming), the associate editor, and the anonymous referees for their valuable comments and suggestions.

## Additional information

### Notes on contributors

Hsien-Jen Lin

Hsien-Jen Lin is Associate Professor of Applied Mathematics at Aletheia University in Taiwan. He received his MS in Applied Mathematics from Michigan State University, USA, and his PhD in Mathematics from National Central University in Taiwan. His current research interests are in the field of production/inventory control, mathematical finance, stochastic model, probability, and statistics. His research has appeared in journals such as Applied Mathematical Modelling, Mathematical Problems in Engineering, Stochastic Analysis and Applications, Statistics & Probability Letters, Journal

an Statistical  
tional Journal  
anagement  
urnal of  
ed  
of

Yu-Jen Lin

Yu-Jen Lin is a Professor in the Department of Industrial Engineering and Management at St. John's University in Taiwan. He earned his BS in Mathematics, MS in Mathematics, and PhD in Management Sciences from Tamkang University. His research interests are in the field of Production/Inventory Control. He has publications in Journal of the International Journal of Production Economics, Computers and Industrial Engineering, Applied Mathematics and Computation, TOP An Official Journal of the Spanish Society of Statistics and Operations Research, International Journal of Systems Science, 4OR - A Quarterly Journal of Operations Research, OR Spectrum, International Journal of Information and Management Sciences, Journal of the Chinese Institute of Industrial Engineers, Yugoslav Journal of Operations Research, Journal of Statistics & Management Systems.
