Abstract

Most research on human sexuality has focused on long-term pairbonds and one-night stands. However, growing evidence suggests there are relationships that do not fit cleanly into either of those categories. One of these relationships is a "booty-call relationship." The purpose of this study was to describe the sexual and emotional

nd sexual those acts Accept All nships. In Essential Onlision of these ature was Settings rast, the requency of type of

relationship situated between one-night stands and serious romantic relationships.

Acknowledgments

We thank Laura Madson and Pamela Izzo for reviewing an earlier version of this manuscript.

Notes

¹A booty-call itself "is a communication initiated towards a non-long-term relationship partner with the urgent intent either stated or implied, of having sexual activity and/or intercourse" (Jonason, Li, & Cason, 2009, p. 3).

²For an alternative perspective on booty-calls—one that does not involve evolutionary psychology—see Caruthers (2006) for an examination of how sociocultural factors may impact the development of such relationships.

³Unfortunately, we did not keep track of this and, therefore, cannot provide another estimate of the frequency of these relationships.

⁴In most research, women report fewer sexual and romantic relationships than men do (e.g., Jonason & Fisher, 2009). This discrepancy, we suspect, is the result of the small sample size and not veridical differences.

Note. Comparisons among superscripts are significant at p < .05. The scale ranges from 1 (not at all), 2 (a little), 3 (moderately), 4 (much), to 5 (very much).

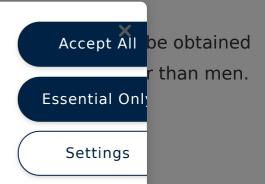

*p < .05. **p < .01.
