Show Purpose

(e.g., satisfaction, emotional responses) explained the highest percentage of variance in interest in a subsequent hookup (56% to 61% across markets) and interest in a relationship (35% to 45% across markets). Although past research suggests there are different markets for other- and same-sex hookups, these findings suggest similarity in contexts that may shape interest in relationship formation among other-sex and same-sex hookup markets. Suggestions for fostering positive relationship development on campuses are discussed.
