## We Care About Your Privacy

We and our 874 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting "I Accept" enables tracking technologies to support the purposes shown under "we and our partners process data to provide," whereas selecting "Reject All" or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the ["privacy preferences"] link on the bottom of the webpage [or the floating icon on the bottom-left of the webpage, if applicable]. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

molecules are reported for the first time.

## Acknowledgements

We wish to thank Prof. Gianfranco Di Lonardo for his valuable help in finding the most accurate calculated frequencies of our observed transitions. This work was financially supported by Ente Cassa di Risparmio di Firenze, by the Laserlab-Europe Consortium in the ALADIN project framework, by the Extreme Light Infrastructure (ELI) European project and by the Progetto Operativo Nazionale (PON) PON01\_01525 'MONitoraggio Innovativo per le Coste e l'Ambiente marino' (MONICA) funded by the Italian Ministry of Education, University and Research (MIUR).

## Notes

aComparison with the HITRAN database [3-4]. The uncertainty reported by the original database for each transition is between 3 and 30 MHz.

bComparison with the HITRAN database [3-4]. The uncertainty reported by the original database for each transition is between 3 and 30 MHz.
