Abstract

This article analyzes the process of financial liberalization in South Korea from the perspective of financial globalization through an international political economic approach. Korean financial liberalization has been highly influenced by the outside pressure of the United States, the OECD and the IMF, as well as by the big business conglomerates.

We Care About Your Privacy

We and our 848 partners store and/or access information on a device, such as unique IDs in cookies to process personal data. You may accept or manage your choices by clicking below, including your right to object where legitimate interest is used, or at any time in the privacy policy page. These choices will be signaled to our partners and will not affect browsing data. [Privacy Policy](#)

We and our partners process data to provide:

Use precise geolocation data. Actively scan device characteristics for identification. Store and/or access information on a device. Personalised advertising and content, advertising and content measurement, audience research and services development.
