We Care About Your Privacy

We and our 855 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting "I Accept" enables tracking technologies to support the purposes shown under "we and our partners process data to provide," whereas selecting "Reject All" or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the ["privacy preferences"] link on the bottom of the webpage [or the floating icon on the bottom-left of the webpage, if applicable]. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

Notes

¹ U.S. Census Bureau economic surveys page on concentration ratios, available at <https://www.census.gov/econ/concentration.html>.

² An alternative source, Compustat data is a common alternative to the US Census Bureau's concentration measure. However, it accounts for only public firms and correlates at a mere 13 percent with the Census Bureau's data, which is considered highly reliable (Ali, Klasa, & Yeung, [2009](#)).

³ This follows how industry-level data on firm size is reported by the US Census Bureau. The U.S. Small Business Administration (SBA) assigns various size standards to industries to classify businesses as "small" under its programs in accordance with 13 C.F.R. § 121.102, and SBA standards may be based on revenues or number of employees, the latter of which may differ from 500 (although a threshold of 500 employees is common).
