actions

tionality

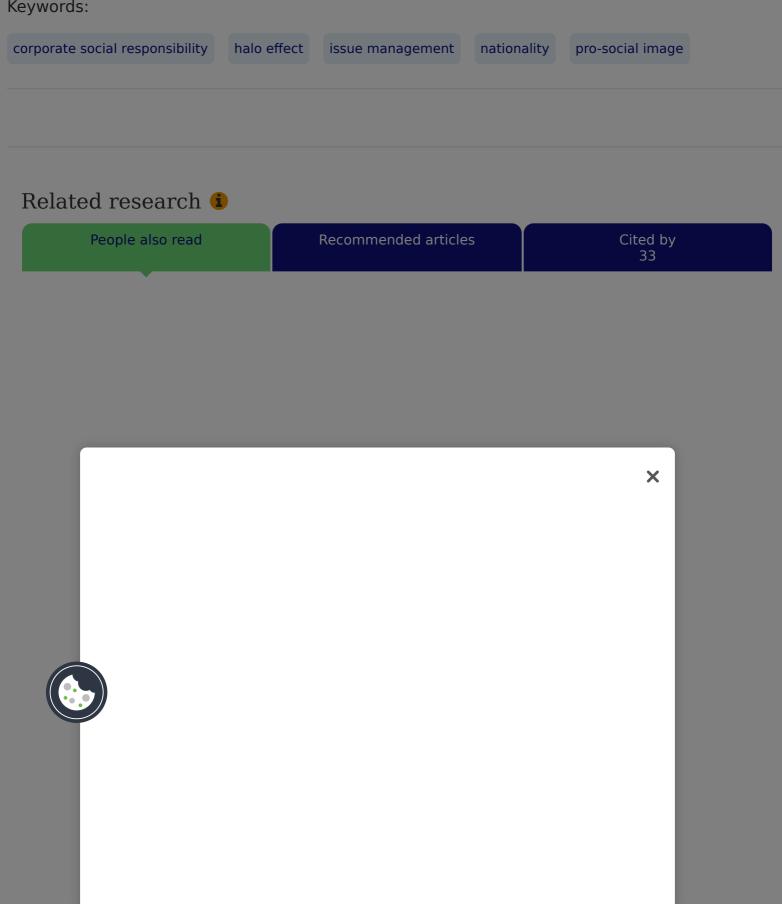

he local

ic) were

significant positive factors in attenuating participants' intention to take action against

the local company. Further, there was a significant interaction effect of CSR activity and the company's nationality on individuals' willingness to take action against the company: CSR activity had a greater positive impact on soothing the public's negative reactions when the local company was identified as foreign rather than domestic. The results were discussed as a halo effect of CSR activities.
