exploratory relationships. survey extent of revealed that uncertainty, s. Further, frequency of general general topic relationship

topic avoidance levels. Theoretical implications for uncertainty management are discussed in light of the unique sibling relationship.

Keywords: Family Relationships General Partner Uncertainty Relational Uncertainty Sibling Communication Topic Avoidance Uncertainty Management

Acknowledgments

The authors wish to thank Jeffrey Rucker for his assistance on an earlier version of the manuscript.

Notes

Note. N=193. 1=Relational uncertainty, 2=General partner uncertainty, 3=Romantic/sexual relationship topic avoided, 4=General topics avoided. All one-tailed correlations are significant at $p < .01$.

Note. N = 193. Across rows, means with superscript letters in common do not significantly differ at $p < .05$.

An earlier version of this manuscript was presented at the 2014 International Personal Communication Conference, San Francisco, CA. I would like to thank the attendees for their helpful comments.
