## Additional information

### Funding

This study was supported by the BK21 Plus project (SW Human Resource Development Program for Supporting Smart Life) funded by the Ministry of Education, School of Computer Science and Engineering, Kyungpook National University, Korea [21A20131600005]; and Basic Science Research Program through the National Research Foundation of Korea (NRF) funded by the Ministry of Education, Science and Technology and National Research Foundation of Korea (NRF) [2016R1D1A1B03933566].

### Notes on contributors

Bhagya Nathali Silva

Bhagya Nathali Silva received the B.S. and M.S. degree in Information Technology from Sri Lanka Institute of Information Technology, Colombo, in 2011. She is currently a Ph.D. candidate of School of Computer Science and Engineering, Kyungpook National University, Korea. Her area of research interests includes Machine-to-Machine (M2M) and Machine-to-Human (M2H) communication.

## Murad Khan

Murad Khan received the B.S. degree in computer science from university of Peshawar Pakistan in 2008. He is currently a Ph.D. candidate of School of Computer Science and Engineering in Kyungpook National University, Daegu, Korea. His area of expertise includes ad-hoc and wireless networks, architecture designing for Internet of Things, and Communication Protocols, etc.

E-mail: [mkhan@netopia.knu.ac.kr](mailto:mkhan@netopia.knu.ac.kr)

## Kijun Han

Kijun Han received the B.S. degree in electrical engineering from Seoul National University, Korea, in 1979 and the M.S. degree in electrical engineering from the KAIST, Korea, in 1981 and the M.S. and Ph.D. degrees in computer engineering from the University of Arizona, in 1985 and 1987, respectively. He has been a professor of School of Computer Science and Engineering at the Kyungpook National University, Korea since 1988.
