Notes

1. Chen and Yeh [1998](#) adopted four outputs – loan services, portfolio investment, interest income, and non-interest income – to analyse the relative efficiency of 34 commercial banks in Taiwan, by using the data envelopment analysis method. In later research, Chen and Yeh [2000](#) used loan services, portfolio investment, and non-interest income to measure bank efficiency, ownership and productivity changes in Taiwan.
2. According to the official report of the Ministry of Finance, any loan for which repayment of interest has been overdue for more than six months will be classified as a non-accrual loan.
3. Cost inefficiency 27 per cent equals $1-(1/1.3762)$.
