Pages 248-265 | Received 28 Apr 2011, Accepted 09 Aug 2011, Published online: 06 Oct 2011

Abstract

Full Article

Reprints & Permissions

This study investigates the effect of consumer characteristics on service quality for self-service kiosks, which, in turn, leads to the actual use of self-service kiosks. In addition, the authors attempt to explore gender differences in two aspects. First, it is investigated if the evaluation process of service quality differs by gender. Second, the moderating effect of gender on the relationships in the conceptual model is examined.
