### **Abstract**

This paper explores processes of market creation in Chile, firstly, in the 1980s as a market for social housing was initially introduced and, 30 years later, as existing market arrangements were adapted to organize housing reconstruction after the 2010 earthquake. Looking in detail at these two cases, this paper describes a type of relationship between economics and economic processes which deviates significantly

from the econom arrange process elem unders distingu econom

## Funding

This research has been funded by WZB Berlin Social Science Center.

## Notes

1 This study is part of a larger research project focusing on different policy instruments, governmental arrangements and urban projects introduced in the context of the reconstruction process, for which more than 80 state officials, expert professionals and citizen representatives have been interviewed. Research has been carried out in 2010, 2012 and 2013 with the help of three assistants, William Osorio, Sabine Biedermann and Patricio Flores.
