Notes

The elaborate mathematical formulae in the footnotes of *The Theory of Business Enterprise* (Veblen [1904](#) pp. 95–96n, 110n, 150n, 153n, 160n, 169–70n, 203–204n, 223n, 230n, 233n, 244n) appear to me to be a straight-faced parody of mathematical economists such as Fisher, comparable to Alan Sokal's *Social Text* parody of the postmodernist side of the science wars.

Raines and Leathers ([2000](#), p. 59) report that in 1923 Veblen suggested that, the Federal Reserve system, working in conjunction with the large financial institutions, would be able to prevent the financial crises of the past'. Veblen died in 1929, before the stock market crash. See Fisher ([1997](#), Vol. 10, pp. 3–26) for Fisher's October 23, 1929, address to the District of Columbia Bankers Association.
