## Abstract:

Expert Systems (ESS) have the potential to make a competitive difference in industry, academia, and government, yet there is little knowledge of how to manage these complex software tools. New activity in the field is booming as a result of civilian and government... development. Early initiatives... have successful... domains. The study... March and... Galbraith... capacity of... of... concerns. Instead of the task becoming more certain and more simple, as one might expect with

### We Care About Your Privacy

We and our 843 partners store and/or access information on a device, such as unique IDs in cookies to process personal data. increased information-processing capacity, the task mutated and the firm began to operate with a higher need for information-processing capacity.

The ES seemed to increase the effectiveness and efficiency of the user firm. The price of the benefits was an increased rigidity in the task. In considering ESS, a manager should be concerned not only with the ES itself, but with the process by which the ES is adapted, and the overall process of creating and using the ES. In addition, the manager needs to consider the effects of the ES on the uncertainty associated with the task and should consciously manage that uncertainty to foster the level of adaptation necessary to keep the ES alive and viable in the organization.

Key Words and Phrases: Expert systems expert systems in financial planning organizational impacts

## Additional information

### Notes on contributors

John J. Sviokla

JOHN J. SVIOKLA is Assistant Professor of Business Administration at the Harvard Business School. He received his B.A. from Harvard College, and his M.B.A. and D.B.A. from Harvard University. His research focuses on the impacts of computer-based decision aids. More specifically, he has

examined the effects of computer-based decision aids on the performance of decision makers. He has also examined the effects of computer-based decision aids on the performance of decision makers across different levels of knowledge and experience. He has also examined the effects of computer-based decision aids on the performance of decision makers across different levels of knowledge and experience.
