Abstract

The author attempts to understand the kamikaze attacks during World War II as a phenomenon that crossed a border into the systematic use of suicide attacks. The author first presents the historical background of the kamikaze attacks during the Pacific (Southwest) War in 1877; the author then examines the psychological factors that led to the kamikaze attacks. To examine the process of the kamikaze attacks, the author examines the role of the kamikaze pilots, the importance of the kamikaze attacks, and the role of the kamikaze attacks in the Pacific War. The author identifies the kamikaze attacks as a phenomenon that crossed a border into the systematic use of suicide attacks. The author emphasizes the importance of the kamikaze attacks in the Pacific War. The author also discusses the role of the kamikaze pilots in the kamikaze attacks. The author concludes that the kamikaze attacks were a result of the kamikaze pilots' decision to cross the border into the systematic use of suicide attacks. The author also discusses the role of the kamikaze pilots in the kamikaze attacks. The author concludes that the kamikaze attacks were a result of the kamikaze pilots' decision to cross the border into the systematic use of suicide attacks.
