ABSTRACT

The underlying cause of the financial meltdown was much more mundane than a “crisis of capitalism”: The real origins lay in mostly obscure housing, tax, and regulatory policies of the U.S. government. The Community Reinvestment Act, the affordable-housing “mission” of Fannie Mae and Freddie Mac, penalty-free refinancing of home loans, penalty-free defaults on home loans, tax preferences for home-equity borrowing, and reduced capital requirements for banks that held mortgages and mortgage-backed securities combined with each other to create the incentives for both subprime lending and the housing bubble that eventually led to the financial collapse.

Notes

1. See the extensive discussion of the Community Reinvestment Act's development in Hossain [2004](#).
2. Quoted in Mason [2007](#). The National Homeownership Strategy was removed from the Department of Housing and Urban Development website in 2007.
