Abstract

Conservation outcomes and social relations: A comparative study of private ranchland conservation easements. This study compares the outcomes of private ranchland conservation easements with those of public lands. The study examines the effectiveness of private ranchland conservation easements in achieving conservation outcomes and social relations. The study also examines the effectiveness of public lands in achieving conservation outcomes and social relations. The study compares the outcomes of private ranchland conservation easements with those of public lands. The study examines the effectiveness of private ranchland conservation easements in achieving conservation outcomes and social relations. The study also examines the effectiveness of public lands in achieving conservation outcomes and social relations.

Acknowledgments

Our research was supported by the University of Wisconsin–Madison Department of Forest and Wildlife Ecology, the Rodney Johnson/Katharine Ordway Stewardship Endowment from The Nature Conservancy, and the National Fish and Wildlife Foundation. Many thanks to all the landowners and conservation staff who participated in this research, and to The Nature Conservancy and the Malpai Borderlands Group. Thanks also to Jake Jacobson, Lynn Lozier, Rich Reiner, Lynn Huntsinger, research assistant Kyle Birchard, and three anonymous reviewers.
