## We Care About Your Privacy

We and our 854 partners store and access personal data, like browsing data or unique identifiers, on your device. Selecting "I Accept" enables tracking technologies to support the purposes shown under "we and our partners process data to provide," whereas selecting "Reject All" or withdrawing your consent will disable them. If trackers are disabled, some content and ads you see may not be as relevant to you. You can resurface this menu to change your choices or withdraw consent at any time by clicking the ["privacy preferences"] link on the bottom of the webpage [or the floating icon on the bottom-left of the webpage, if applicable]. Your choices will have effect within our Website. For more details, refer to our Privacy Policy. [Here](#)

organizations (NGOs). Easements entail a combination of collaborative and regulatory approaches, and their embedded social relations are important for conservation outcome assessment. These findings have significant implications for how conservation programs are designed, monitored, enforced, and evaluated.

Keywords: collaboration conservation effectiveness evaluation grazing nonprofit organizations policy outcomes policy outputs private land conservation property rights regulation

## Acknowledgments

Our research was supported by the University of Wisconsin–Madison Department of Forest and Wildlife Ecology, the Rodney Johnson/Katharine Ordway Stewardship Endowment from The Nature Conservancy, and the National Fish and Wildlife Foundation. Many thanks to all the landowners and conservation staff who participated in this research, and to The Nature Conservancy and the Malpai Borderlands Group. Thanks also to Jake Jacobson, Lynn Lozier, Rich Reiner, Lynn Huntsinger, research assistant Kyle Birchard, and three anonymous reviewers.
