Acknowledgements

This paper builds on a research project that was commissioned by VISION Era-Net, a collaborative network of nationally leading innovation policy organisations (www.visioneranet.org). This project explored the implications of the open innovation framework for policymaking (see De Jong et al. [2008](#)). Additional funding was provided by the Estonian Science Foundation (grant no. ETF8423). We thank Erkki Karo and Steven Peleman for research assistance and Henry Chesbrough, Hannes Toivanen, Luuk Klomp, Peter Spyns and Lauri Tammiste for their comments and feedback. We are also indebted to two anonymous referees for their valuable comments.

Notes

We have identified these guidelines by confronting the different dimensions of open innovation (see section entitled 'Open innovation' the different policy areas that seem to be relevant. The guidelines themselves are the result of several discussions with innovation policy experts in the Netherlands, Flanders (Belgium) and Estonia. For more information, see De Jong et al. ([2008](#)).
