Abstract

Arms transfers are financed through a variety of means, including cash payments, barter transactions, and other forms of exchange. During the Cold War, however, arms imports were financed by international banks. This is a result of the economic burdens placed on the Soviet Union by the arms race. The overall economic situation of the Cold War led to a significant reduction in arms funding. The economic crisis due to the 1980s led to a reduction in arms spending with the Soviet Union. The off customers of the Soviet Union had import old weapons among customers in the military market increased in the 1990s.

We Care About Your Privacy

We and our 843 partners store and/or access information on a device, such as unique IDs in cookies to process personal data. You may accept or manage your choices by clicking below, including your right to object where legitimate interest is used, or at any time in the privacy policy page. These choices will be signaled to our partners and will not affect browsing data. [Privacy Policy](#)
