## Abstract

A new compound, trollioside, was isolated from the flowers of *Trollius chinensis*. The compound was characterized by its molecular formula,  $C_{20}H_{28}O_6$ , and its structure was confirmed by  $^1H$  NMR,  $^{13}C$  NMR, and mass spectrometry. The compound was found to be a new compound, and its structure was confirmed by  $^1H$  NMR,  $^{13}C$  NMR, and mass spectrometry. The compound was found to be a new compound, and its structure was confirmed by  $^1H$  NMR,  $^{13}C$  NMR, and mass spectrometry.
