Abstract

Psychology rarely examines the effects of economic systems on people's lives. In this target article, we set out to explore some of the costs of American corporate capitalism and its focus on self-interest, competition, hierarchical wage labor, and strong desires for financial profit and economic growth. Specifically, we apply recent cross-cultural research

Notes

- *
 - ¹It is possible that the psychological impacts of economic phenomena were discussed without referring to “capitalism.” Scholars in some fields use words such as “industrial society” and “market society” when referring to capitalism that may have been missed in our search. We also note that we did not include book reviews or comments on other articles in our search results.
 - ²In the current target article, we use the term “internalization” to refer to the process of taking in and eventually regulating beliefs and/or behaviors that were originally outside of the person. Sometimes people integrate beliefs and behaviors with the self and feel autonomous, whereas other times they internalize in a less self-determined and more controlled fashion (see [Deci and Ryan 2000](#)). As we shall demonstrate later in the article, internalization of capitalistic ideology and behavior frequently is of this latter, less optimal type.
 - ³Even economist [Adam Smith \(1776/1976\)](#), on whose work much of ACC's claims about self-interest in capitalism are based, would support the claim that the primary motives for capitalist behavior are not necessarily economic. He argued that the desire for wealth and power are also important motives.
 - ⁴It is important to note that the standard model of capitalism, as espoused by neoclassical economists, does not easily live a life of voluntary simplicity and use the productivity of capitalism to protect the

environment as to live a life of conspicuous consumption and burden the environment. We hold that this picture is not consistent with the available data.

⁵Fair or not, it is clear that wealth inequality is problematic in many regards, including both mental and physical health ([Albee 1986](#); [Wilkinson 1996](#)).
